How to create a Backup file of the system Log

Caution : For any configuration, you need to connect an HDMI display device directly to the back of the recorder (Monitor or TV)

The system log shows you important system events, such as motion alarms and system warnings. You can easily create a backup file of the system log for a set time period to a USB flash drive.

Go to **SETUP**, then **SYSTEM** and **MAINTENANCE** and choose **LOG** Menu.

- 1- Choose the Starting Date & Time
- 2- Choose the End date & Time
- 3- Select the type of events you would like to search from the dropdown next to **Log Type**, or select **All** to see the entire system log for the selected time period.
- 4- Click **Search**

- 5- Click **Backup** to create a backup of the system log for your search period
Please make sure your flash drive has been connected to your NVR's USB port. connue.
- 6- **OK** to finish

Backup Verification into your USB stick
